OUR MISSION

The College of Pharmacy is a nationally-recognized, statewide institution for the education of pharmacy practitioners in the delivery of pharmaceutical care. This mission includes the delivery of highest quality prelicensure education, graduate education in the pharmaceutical and social/administrative sciences, and competency enhancement of pharmacy practitioners. The college is the State’s resource for scientific investigation on pharmaceutically-related health issues. Educational, service, and research programs are tailored to meet the specific needs of the citizens of Idaho.
The College of Pharmacy has a proud history dating back to 1920. The college presented the first baccalaureate degree conferred on the ISU campus which was at that time the Southern Branch of the University of Idaho. The goals of the program have evolved in complexity and sophistication over the years. The college’s administration, faculty, and staff are committed to offering the highest quality professional pharmacy education, enabling graduates to enhance the clinical, economic, and humanistic outcomes of drug therapy for their patients.

The health care system, like the profession of pharmacy, is evolving rapidly. The college will continue to play a vital role in the discovery of new knowledge in the biomedical, social, administrative, and clinical sciences. Innovations will be created by nurturing partnerships with health care providers, industry, business, and government. The college’s well qualified and talented faculty will enhance Idaho State University’s reputation even more in the exciting years ahead.

With Regards,

Richard L. Bowen, President
A MESSAGE FROM THE DEAN

The 1999-2000 year was marked by strategic planning, curriculum development, expansion of the research program, and many other student and faculty accomplishments.

Drs. Adeboye Adejar and Nandita G. Das joined the Department of Pharmaceutical Sciences in the fall, adding teaching and research strength in medicinal chemistry and pharmaceutics, respectively. Dr. Vinita Pai joined the Department of Pharmacy Practice and Administrative Sciences augmenting the opportunity for pediatric clerkships in Boise.

The faculty undertook a careful revision of the college strategic plan in response to the faculty’s self-study document as well as comments and recommendations outlined in the accreditation report of the American Council on Pharmaceutical Education. Input was sought from a broad-based constituency, including students and alumni in crafting the new document. The result, a new vision, mission, and values statement along with updated goals and objectives that were adopted unanimously by the faculty in January of 2000.

Dr. Cynthia Foster was appointed Director of Student Relations and Admissions. She is charged with coordinating all recruiting and admissions and serves as the advisor for all pre-pharmacy students. She and Dr. Paul Cady, Associate Dean, traveled the state to maintain close contact with pre-pharmacy students and pre-professional advisors at all nine institutions of higher learning in Idaho. Dr. Cady, working in collaboration with the faculty, continuously assessed the curriculum and learning outcomes to ensure that the college is preparing students to enter the rapidly changing pharmacy profession with abilities to improve therapeutic outcomes and quality of life of their patients. With the help of alumni, industry, and friends of the college, almost $101,000 in scholarships was awarded to pharmacy students. The generosity of these committed individuals and companies makes a world of difference in the lives of our students.

Seventy-three students graduated from the Doctor of Pharmacy program, 48 from the traditional pathway and 25 from the nontraditional pathway. We are very proud of our graduates and wish them every success as they begin their journey as practitioners and leaders in the profession and in their communities. Fifty-six students were admitted to begin pharmacy studies in the fall of 2000. Admission remains competitive, and the qualifications of these students are outstanding, not only with regard to academic accomplishments, but also with respect to their experience, communications skills, and commitment to their communities.

State appropriations increased only slightly and represented only 57% of the college’s total budget. Endowment earnings increased 126%, gifts and contributions increased 70%, and grants and contracts increased 22% over the last fiscal year. These accomplishments speak to the dedication of our excellent faculty and staff who worked tirelessly to fulfill the mission of the college and University.

Excellence in teaching is a primary goal of the college. To ensure continued excellence, the faculty from both academic departments worked extremely hard over the course of the year to develop a revised curriculum. The Curricular Revision Task Force is comprised of Drs. Chris Daniels (Chair), John Erramouspe, Rex Force, Barbara Mason, Leslie Devaud, Nikki Chopski, Nandita G. Das, and professor Teddie Gould. Through numerous discussions, workgroups, and two retreats, the Task Force led the faculty to adopt a new pre-pharmacy curriculum and designed the framework for the new Doctor of Pharmacy curriculum. The entire faculty and student body are in their debt for their dedication to curricular excellence as well as their unselfish commitment of time and creativity.

The faculty in the Department of Pharmacy Practice and Administrative Sciences continue to...
focus attention on compensation for drug therapy management by pharmacists and strengthening of collaborative practice arrangements with physician colleagues. Particular recognition goes to Drs. Vaughn Culbertson, Rex Force, and Dennis Sawyer for their enormous efforts in these critical areas.

Over 150 students have graduated from the Nontraditional Doctor of Pharmacy Program since its inception in 1989, and approximately 170 are currently enrolled. As no state-appropriated funds are allocated to its operation, this program is entirely self-supporting. The nontraditional program curriculum is challenging and continues to evolve, incorporating more case-based, active learning, and electronic components. Drs. Vaughn Culbertson and Catherine Heyneman are to be commended for their leadership of this program.

The research program continues to strengthen in both academic departments. Four pharmacy faculty currently have research programs funded by the National Institutes of Health (NIH). These faculty are Drs. Leslie Devaun, Adeboye Adejare, Anna Ratka, and Rex Force. For both departments, the number of published manuscripts, abstracts, and research presentations continues to increase.

Dr. Jim Lai spent the spring semester on sabbatical at Yale University School of Medicine studying alterations in brain metabolism during development, epilepsy, and ischemic brain injury. Dr. Rex Lott was honored by the university as the Outstanding Public Servant. The university presents this award to one faculty member each year, and the College of Pharmacy is honored to have one of its own recognized in this way. Additionally, Dr. Eric Jarvi was recognized by ISU’s chapter of the Scientific Research Society, Sigma Xi, with the Jerome Bigelow Award for his contribution to ISU and the community in science, teaching, and research.

The college continues to contract with the Idaho Department of Health and Welfare to provide staff support for the Idaho Drug Utilization Review (DUR) Board. This Board is charged with maximizing safe and cost-effective drug therapy for Idaho Medicaid recipients. The Board staff, under the direction of Dr. Vaughn Culbertson, is responsible for analysis of drug use patterns, designing educational and other interventions, and implementing all Board actions. Our activity in this program enhances not only our teaching at the undergraduate and graduate levels, but also our research and service mission.

The College of Pharmacy is so fortunate to have the highest caliber faculty and staff. The faculty’s participation and leadership within local, state, and national professional and scientific associations make a meaningful difference for the profession, our college, and ultimately for patient care in Idaho and beyond. The staff go far beyond expectations on a daily basis, and do so for the love of the college. We are so fortunate to be the beneficiaries of their loyalty. A huge thanks is also due our affiliate and adjunct faculty. Without their many contributions, we simply could not succeed in offering the highest quality pharmacy education.

The alumni and friends of the college are the final ingredient in our prescription for success. Their many gifts – time, wisdom, and dollars – enable program enhancements that would otherwise be impossible and help us transcend boundaries that have limited us in the past. I have every confidence that working in concert with faculty, staff, students, alumni, and friends of the college, we can achieve undreamed of success in the years ahead.

"I have every confidence that faculty, staff, students, alumni, & friends of the College, working in concert, can achieve undreamed of success in the years ahead."

Barbara G. Wells
Dr. Barbara G. Wells
Dean and Professor
COMMITTEES OF THE ISU COLLEGE OF PHARMACY

Committees are comprised of faculty members, staff, & students. Faculty members on college committees (except the Technology Committee) serve two-year terms. Those serving on university committees may have longer terms. Students are appointed for one-year terms. Faculty members are elected by their colleagues for the Faculty Affairs Committee; departmental representatives on other standing committees are appointed by the college’s Administrative Council.

Assessment Committee
Curricular Affairs Committee
Curricular Revision Task Force
Faculty Affairs Committee
Graduate Education & Faculty Research Affairs Committee
Student Affairs Committee
Technology Committee
The Dean's Advisory Council (DAC) serves as an advisory body to the dean of the College of Pharmacy. The DAC meets twice a year and provides counsel regarding the college's curriculum, strategic planning, fundraising, program assessment, activities and functions, proposed legislation, and other areas as required. The membership of the DAC includes state and national pharmacy leaders, alumni, practicing pharmacists, pharmacy owners, and corporate and industrial leaders. Members of the DAC serve three-year terms that may be repeated at the discretion of the dean. The dean makes appointments to the council with recommendations from the DAC and college administration. The college sincerely appreciates another exemplary year of service from the following council members:

James Alexander, Sav Mor Drug  
Gregory Betts, Cassia Regional Medical Center  
Marion Bowen, Retired/Idaho Board of Pharmacy  
Eric Cannon, Intermountain Health Care  
Nicole Chopski, Northwest Pharmacies, Inc., & Bannock Regional Medical Center  
Jo/An Condie, Idaho State Pharmacy Association  
Lisa Cowley, Prescription Center  
Charles Davis, ShopKo  
Paul Driver, Pocatello Regional Medical Center  
Edith Dvorak, Pocatello Regional Medical Center Plaza Pharmacy  
William Eames, William M. Eames & Associates  
Tamara Eide, St. Alphonsus Regional Medical Center  
Ronald Endo, Pocatello Regional Medical Center  
Robert Fischer, Ontario Clinic Pharmacy  
James Francis, St. Luke's Regional Medical Center  
Allen Frisk, St. Alphonsus Regional Medical Center  
Dorothy Galloway, Bannock Regional Medical Center  
Lorri Gebo-Shaver, Super Save Drug  
Neil Griggs, Teton Pharmacy & Home Health  
Steven Hadlock, The Medicine Shoppe  
Michael Hess, Northwest Pharmacy  
Kent Jensen, The Medicine Shoppe  
Cathi Ketterling, Sav Mor Drug  
Shawna Kittridge, Idaho Care Systems & Joint Commission for Accreditation of Health-Care Orgs.  
Dale Lavigne, Lavigne Drug Group  
Don Leonard, Chateau Drug  
Richard Markuson, Idaho Board of Pharmacy  
Barbara Mason, Idaho State University  
Gary Meadows, Washington State University  
Larry Munkel, Pocatello Regional Medical Center  
Neil Reed, Eastern Idaho Regional Medical Center  
George Roe, Costco  
Frank Savage, Agouron Pharmaceuticals, Incorporated  
Steve Shapiro, Albertson's, Inc.  
Marilyn Silcock, Bannock Regional Medical Center & the Idaho Board of Pharmacy  
Sidney Sly, Retired/Intermountain Health Care  
Karen Smith, Merck & Company, Incorporated  
Edward Snell, Ed Snell's Pharmacy Shop  
Dorie Sullenger, Madison Memorial Hospital  
Frank Talboy, VA Medical Center  
John Tilley, Tilley's Apothecaries, Inc.  
Rob Tyler, Tyler's Gem Pharmacy  
Dwight Wallace, Wallace Drug  
Ralph Wheeler, Idaho State Senator  
Jeanette Wiegand, Idaho State University Student Health Center  
Gary Willburn, Lemp's Apothecary  
Lynette Williams, Northwest Pharmaceuticals, Inc.  
John Wiltsie, Idaho Society of Health-System Pharmacists  
Theodore Young, Procter & Gamble Pharmaceuticals
FROM THE OFFICE OF THE BUSINESS MANAGER

The state-supported budget of Idaho State University College of Pharmacy increased from $3,090,849 in Fiscal Year ’99 to $3,187,739 in Fiscal Year 2000. This represents a three percent increase in state support for the college. The state-supported budget includes monies for faculty and staff salaries, equipment, materials, supplies, and communication costs for the college.

The college received gifts in the amount of $184,963 which includes contributions made through the annual phonathon fund drive. Grants and contracts received by College of Pharmacy faculty and graduate students in Fiscal Year 2000 totaled $744,729, and the indirect cost recovery from grants was $33,368. Earnings from endowment funds netted the college $657,744. Student fees added $693,815 to the college’s budget. Sales and services brought in $32,423.

In order to fulfill the mission of the College of Pharmacy, state funds alone are not enough to meet the needs of the educational, research, and service programs of the college. Additional funding is needed for research, student support, equipment, technology upgrades, student scholarships and fellowships as well as special programs. Annual giving and endowment income are vital components of the college’s budget, and have continued to grow in a time of modest, if any, increases in state budgets.

Ruth Briscoe, B.B.A.
Business Manager, ISU College of Pharmacy

**Total: $466,679**  
**College Total: $466,711**  
**Funding Agency Total: $923,390**

Note: Some awards are for multiple years
FROM THE OFFICE OF THE ASSOCIATE DEAN

The 1999-2000 year has been a year of change and progress in student affairs. One change of note was the appointment of Dr. Cynthia Foster as the Director of Student Relations and Admissions. Dr. Foster has been responsible for much of our recruiting success this year. In addition to recruiting and admissions, she serves as the advisor for all pre-pharmacy students.

This year, 73 students graduated from the professional program: 48 from the traditional Doctor of Pharmacy program and 25 from the nontraditional program. Competition among employers for graduates was intense. Recruiters from across the country came to the college to talk with our students. All students who were seeking employment were able to find a position. Five graduating students reported that they had chosen to continue their education by completing a post-graduate residency program. We are proud of all of our graduates. These fine pharmacists are well prepared and capable of becoming leaders and agents of change in the profession.

With the assistance of alumni, industry, and friends of the college, we were able to provide scholarships for many of our students. During the 1999-2000 year, the college was able to award nearly $101,000 to pharmacy students. On behalf of the faculty and students, I would like to thank all those that made contributions to scholarships and endowments of the college. Their generosity makes it possible for many of our students to pursue their goal of becoming a pharmacist.

Changes in the profession of pharmacy are opening doors to many new and exciting roles and careers. It is wonderful to see the rapid development and growth of collaborative practice agreements in Idaho, and it is indeed exciting to see our students working with pharmacists who have developed specialty clinics and immunization programs. The faculty at the College of Pharmacy continue to evaluate the curriculum, ensuring that we continue to prepare students to meet the changing demands of the profession. The faculty and students, with helpful input from practitioners, are committed to ongoing monitoring and revision of the curriculum.

Maintaining an adequate supply of practitioners necessitates that we work diligently in maintaining and recruiting pre-pharmacy students. By advising and maintaining personal contact with pre-pharmacy students at Idaho State University and our affiliate institutions, the Associate Dean’s office strives to assist students to prepare themselves for admission into the Doctor of Pharmacy program and the profession of pharmacy. The Associate Dean’s office actively recruits pre-pharmacy students and communicates with advisors at Idaho’s nine institutions of higher learning: Albertson College, Boise State University, the College of Southern Idaho, Idaho State University, Lewis and Clark State College, North Idaho College, Northwest Nazarene College, BYU-Idaho, and the University of Idaho.

Over the course of this year, Dr. Foster and I were actively involved in recruitment as we traveled the state, visiting pre-pharmacy students, potential pre-pharmacy students and advisors at universities, colleges, and high schools. In addition, numerous potential recruits visited the college and met with advisors. Such recruitment efforts are crucial and rewarding as we seek to help students to prepare for our competitive admissions process.

Admission into the traditional Doctor of Pharmacy program remains competitive. Two hundred and twenty-five applications were received for the fall 2000 class. Of the 225 applications received, 101 applicants were invited to interview, and 56 were admitted to begin the fall 2000 semester. Idaho residents represented 74% of the incoming class.

Participation in student activities was excellent this year. Students of the college participated in recruitment, admission interviews, research, immunization clinics, poison prevention, health fairs, and ISU Day at the Capitol. They also
provided Christmas presents for local families. Various student activities included an awards banquet to honor graduates as well as beginning and end of the year picnics. Both picnics were sponsored and coordinated by student organizations. The end of the year picnic followed a faculty-student golf tournament where the students succeeded in humbling the faculty. These and other activities provide valuable opportunities for our students to socialize informally with faculty and other students.

We are proud of our students. While recruiting students throughout Idaho, I try to visit as many pharmacies as possible. It is indeed gratifying to see our past graduates who are very successful practitioners, and it is very rewarding to hear of their accomplishments and see the difference they make for their patients and their communities. I consider it a great privilege to have played a small part in the education and training of these fine pharmacists.

Cynthia Foster, D.A., Director of Student Relations and Admissions
DEPARTMENT OF PHARMACEUTICAL SCIENCES

In 1999-2000, the Department of Pharmaceutical Sciences continued its commitment to a high quality of teaching combined with a renewed effort to strengthen research. Two new faculty members, Drs. Adeboye Adejare and Nandita G. Das joined the department in the fall. These two new faculty add teaching and research expertise in the areas of medicinal chemistry and pharmaceutics, respectively. To support basic science research efforts, the faculty must actively engage in intense national competition for research funding, a significant challenge. The Department of Pharmaceutical Sciences faculty, for the second year in a row submitted over $2.9 million in research grants to various funding agencies, such as the National Institutes of Health (NIH) and the National Science Foundation (NSF), the Burroughs Wellcome Fund, the American Association of Colleges of Pharmacy, private funding organizations, and several pharmaceutical companies. Total department research funding increased to over $900,000 from all sources. This funding included three faculty research projects funded by the NIH which were awarded to Dr. Leslie Devaud ($679,000 over 5 years), Dr. Adejare ($54,000 – 1 year), and Dr. Anna Ratka ($50,000 – 1 year). The department faculty also had 24 research manuscripts, review articles, and book chapters submitted, accepted, or published.

Dr. Jim Lai spent the spring 2000 semester on sabbatical at Yale University School of Medicine. He spent six months absorbed in developing several collaborative research projects studying how brain metabolism alters in epilepsy, development, and ischemic brain injury. He returned energized with many excellent ideas for research projects and ready for a significant research grant writing effort.

Drs. Eric Jarvi and Leslie Devaud continued to lead the department’s graduate program. The graduate program now has ten Ph.D. students and three students pursuing their Masters degree. The objectives of the program encompass the broad training of Ph.D. pharmaceutical scientists, and include a strong component emphasizing critical thinking as well as oral and written communication skills.

The faculty, in concert with the teaching mission of the university and college, were very busy teaching courses at the undergraduate, graduate and professional program level (see Appendix II). In addition to courses traditionally taught in the Pharm.D program, the faculty also taught over 30 credit hours divided among 14 sections of service courses to other health professions programs in locations including Pocatello, Lewiston, Twin Falls, Boise, and Idaho Falls.

In the area of university service, faculty are extremely busy with responsibilities in the operation and self-governance of the college and university. These duties go far beyond their customary teaching responsibilities. Their accomplishments bring a strong sense of pride and recognition to the college and university as well. Highlighting one service effort, Dr. Eric Jarvi was recognized by ISU’s chapter of the Scientific Research Society, Sigma Xi, with the Jerome Bigelow Award for his contributions to ISU and the community in science, teaching, and research.
The next several years will be exciting for the Department of Pharmaceutical Sciences as the five new faculty have brought renewed vigor to the department’s research efforts and fresh ideas to our teaching efforts. Over the next year, the entire faculty will be designing a new curriculum. All these varied efforts collectively will enhance the visibility and prestige of the department, the college, and the university.

Christopher Daniels, Ph.D.
Chair

“The Department of Pharmaceutical Sciences continued its commitment to a high quality of teaching combined with a renewed effort to strengthen research.”

PHARMACY STUDENTS RECEIVE $101,000 IN SCHOLARSHIPS

Seventy-six students at Idaho State University’s College of Pharmacy received scholarships from the College of Pharmacy during the 1999-2000 academic year. Thanks to the donations of many alumni, friends and the pharmaceutical industry, awards totaled $101,000. The scholarships were provided by a variety of sources, including retail pharmacies, pharmaceutical companies, the state’s professional pharmacy organizations, private donors, and the Kasiska Foundation.

Companies contributing scholarship funds to the college included American Drug-Osco/Sav-On, Alberton's, Bi-Mart, Fred Meyer, Longs Drug Stores, Wal-Mart, Owen Healthcare, Ed Snell’s Pharmacy Shop, and the National Association of Chain Drug Stores. First-time awards to students were made from several endowments including the Roy Y. & Linda Sumida Scholarship Endowment, the Lucille H. Kingsbury Memorial Scholarship Endowment, the Robert L. & “Bill” Dixon Memorial Scholarship Endowment, and the John B. Kanarr Scholarship Fund.
DEPARTMENT OF PHARMACY PRACTICE & ADMINISTRATIVE SCIENCES

During academic year 1999-2000, department faculty undertook a variety of curricular, research, and committee service activities to stay abreast of the challenges impacting pharmacy practice and education. Adding to these challenges are the many therapeutic, biomedical, and technological advancements that affect the delivery of pharmaceutical care services on a daily basis. The positive responses to these formidable tasks have been extremely gratifying, and I would like to briefly comment on some of the faculty’s activities and accomplishments during the year.

Curriculum revision was an important effort during the academic year, and I would like to recognize Drs. Erramouspe, Force, Mason, and Professor Gould for their unselfish dedication and significant efforts as part of the Curricular Revision Task Force. Their efforts were instrumental in the development of a contemporary curricular framework that will continue the high standards expected of ISU graduates. Although much work remains, I commend the faculty for their commitment to educational excellence and a state-of-the-art professional curriculum.

Additionally, the department has continued to focus attention on reimbursement of cognitive services as a critical professional issue. In this regard, I would like to recognize Dr. Dennis Sawyer for his enormous energy and efforts in pushing this agenda forward, not only within Idaho but on a national level as well. Dr. Sawyer has been a long time Affiliate Faculty member, teaching Clinical Pharmacokinetics as well as providing clerkship instruction. As Dr. Sawyer and other clinical faculty continue to develop and strengthen collaborative practice arrangements with their physician colleagues, I look forward to reporting some exciting achievements in this arena.

A continuing emphasis on research and scholarship is evident from the department’s contribution to funded grants and scholarly publications. Departmental faculty contributed as principal investigators to four research projects and five educational or service contracts during the academic year. A similar trend is evident from the list of publications authored during the year, which included 22 published manuscripts and 7 book chapters. Additionally, departmental faculty presented 17 abstracts at national scientific and professional meetings.

In the areas of committee service and patient care, it is evident that the faculty were extremely hard-working, far beyond their customary teaching responsibilities. Additionally, departmental faculty members delivered more than 19 presentations to the general public, pharmacists, various health care practitioners, and other researchers during the academic year. Furthermore, faculty members participated in local, state, and national pharmacy organizations. Many faculty were actively involved in daily patient care responsibilities and collaborated closely with other health care practitioners in the community via patient care conferences and committees. Finally, department faculty served on a number of college and university committees. Each member of the department deserves recognition for their individual contributions. Their accomplishments are truly remarkable and bring a strong sense of pride and recognition to the college and university as well.

I would like to recognize the nearly 200 affiliate faculty who contribute so importantly to our educational program. Additionally, I would like to recognize a special group of
practitioners/educators. This special group includes pharmacists at the University of Nevada Medical Center, Las Vegas, NV; Reno VA Medical Center, Reno, NV; Washoe Regional Medical Center, Reno, NV; the Naval Medical Center, San Diego, CA; and Magic Valley Regional Medical Center, Twin Falls, ID. This group of individuals exemplifies the best in pharmacy education and practice on a daily basis. Moreover, they have contributed significantly and positively to the clinical clerkship program for many years. Finally, recognition is due to departmental secretaries Ms. Sharlene Hetrick and Ms. Chris Marenda. Their extraordinary skill and abilities in managing the myriad of details each day never ceases to amaze me. I thank all of you for your dedication and devotion to the college and our students. Your efforts are essential to our success.

I am extremely proud of the department’s record of accomplishments, and am again honored to have served as chair. Perhaps most importantly, however, I believe the future holds great promise and many opportunities. I look forward to reporting even greater accomplishments next year!

Vaughn L. Culbertson, Pharm.D.
Chair

---

**LOTT RECEIVES ISU HONOR FOR PUBLIC SERVICE**

Dr. Rex Lott was honored with the Idaho State University Distinguished Public Service Award during Commencement ceremonies May 13. This prestigious award is given each year to one faculty member that provides exceptional service to the community, university and/or discipline with which they are affiliated. Specifically, Dr. Lott was honored for his commitment to treating psychiatric disorders, developmental disabilities and epilepsy; correcting public misunderstandings about these conditions; and providing information for both those affected and their health care providers. Lott teaches in the Department of Pharmacy Practice and Administrative Sciences in Boise, where his service work helps give ISU a strong visible presence. He has served on the advisory board of the Epilepsy Foundation of Idaho, for which he has helped organize annual education programs throughout Idaho.
CONTINUING EDUCATION

The College of Pharmacy has maintained an active role in providing continuing education (CE) to pharmacists in the state of Idaho. As the complexity of providing pharmaceutical care has become more challenging, practicing pharmacists desire our faculty’s expertise to update their skills and continue to develop their own level of competency. As such, the college has continued to offer the following quality programs:

LIVE CE PROGRAMMING

From July 1, 1999 to June 30, 2000, the college provided and/or sponsored 139 hours of live programming for pharmacists in Idaho and other areas. Live programming topics included disease-state management, pharmacotherapy, pharmacy practice legal issues, physical assessment, and immunizations. Programs were offered throughout the country, including Mississippi, California, Idaho, New York, and Texas. One thousand, one hundred and sixteen pharmacists attended these programs, earning 11,901 hours of CE.

HOME CORRESPONDENCE COURSES

The college is committed to providing CE to pharmacists statewide. While a large portion of the Idaho population is located in the Boise area, the college recognizes the need to extend opportunities for pharmacists in rural areas to obtain CE credit. Over the past year, the college offered 27 Pharmat courses. Pharmat allows practitioners to increase their knowledge through home, self-paced study. Each program is developed by college faculty members nationwide and meets ACPE standards for content and quality. The following topics were offered: AIDS, arthritis, asthma, diet disorders, drug interactions, drug counseling, impotence, infectious diseases, pain management, pharmacoconomics, pharmacy federal law, smoking cessation, ulcers, and a host of others.

Thirty-three pharmacists completed home correspondence programs and received 393 hours of CE credit.

NONTRADITIONAL PROGRAMME

Additionally, the college offered CE to nontraditional Pharm.D. students. Each course, developed by ISU faculty, uses videotapes, textbooks, and workbooks to provide a comprehensive study of each area. Pharmacists from across the nation received credit after successfully completing any of the following courses and clerkships:

• Courses: Clinical Chemistry, Clinical Pharmacokinetics, Clinical Research Design and Analysis, Drug Information, Human Pathophysiology, Basic Immunology, Pathogenic Microbiology, Therapeutics I, Therapeutics II, Problems in Pharmaceutical Diagnosis, Physical Assessment, Quality Assurance, and Cost Containment.

• Clerkships: ambulatory care, internal medicine, and pharmaceutical care.

One hundred thirty-one pharmacists completed these programs during 1999-2000 receiving 4,635 hours of CE credit.

SUMMARY COMPARISON

Overall, 1,280 pharmacists completed live, home correspondence or nontraditional CE programs totaling 16,929 hours of CE. The college received CE funding support this past year from: American Society of US Surgeons; Idaho State Board of Pharmacy; ISU Speakers and Artists Committee; Peer Perspectives, A Division of Robert A Becker, Inc.; and the Society of Air Force Pharmacists.
PHARMACY PRACTICE RESIDENCY PROGRAM

Continuing development of pharmacy practice postgraduate training opportunities was an important accomplishment during the 1999-2000 academic year. Pharmacy practice residents participated in numerous professional and educational activities. In addition to pharmaceutical care responsibilities, their efforts included student clerkship teaching, case study tutorials, presentation of seminars and posters at state and national meetings, delivery of numerous in-service educational programs, and research projects.

Despite increasing financial pressures, we are optimistic about future opportunities and enthusiastically committed to a strong postgraduate training program to meet the health care needs of Idaho citizens. Two new residency positions were added for 1999-2000, and we look forward to funding of additional residency and fellowship experiences in the future.

"We are optimistic about future opportunities & are committed to a strong postgraduate training program to meet the health care needs of Idaho citizens."
IDAHO DRUG INFORMATION SERVICE

The Idaho Drug Information Service, directed by Jan Beckwith, Pharm.D. and Catherine Heyneman, Pharm.D., MS, is located on the top floor of Idaho State University’s Oboler Library in Pocatello. This service provides pharmaceutical care consultations and drug information to physicians, pharmacists, and laypersons throughout the state of Idaho. Additionally, the Drug Information Service provides instruction and training in drug information to first- and fourth-professional year ISU College of Pharmacy students.

The Drug Information Service maintains up-to-date electronic information through the purchase of Micromedex® and International Pharmaceutical Abstracts and by utilizing other medical databases available through Oboler Library and on the Internet.

Nine fourth-professional year Doctor of Pharmacy candidates completed clinical clerkships in drug information in 1999-2000. Two of these students wrote drug consults which have been published in the Micromedex® system—a database considered essential in almost all hospital pharmacy settings.

Dr. Heyneman has utilized the resources available at the Idaho Drug Information Service to publish a review article on infliximab in Pharmacotherapy, a drug information rounds article on the use of calcitonin for phantom limb pain in The Annals of Pharmacotherapy, two book chapters in the Pharmacotherapy Casebook, two WebStudies cases, and several drug consults in Micromedex®.

The Idaho Drug Information Service offers a one-year residency in drug information. This training program is designed for recent graduates who want to pursue publication in the biomedical literature, develop mastery of skills, and attain an expert level of competency in drug information. Residents gain experience in teaching drug information and case studies to traditional and nontraditional Pharm.D. students; preparing and publishing drug consults; reviewing articles, and WebStudies cases; as well as administration of an academic drug information service.

1999 ISU PHARMACY CLASS SCORES BIG

The Idaho State University Doctor of Pharmacy class of 1999 had a pass rate of 100 percent on the North American Pharmacist Licensure Exam (NAPLEX), the national licensure exam for pharmacists, announced Dr. Barbara G. Wells, dean of the ISU College of Pharmacy.

Fifty-one ISU Pharm.D. students took the exam last summer. “The ISU College of Pharmacy has had a passing rate of 98 percent for several years, but our goal has been a 100 percent pass rate,” said Wells. “I couldn’t be more proud of our students and faculty.”
NONTRADITIONAL PHARM.D. PROGRAM

The nontraditional doctor of pharmacy (Non-T) program is designed to provide practitioners holding a bachelor’s degree in pharmacy and a valid U.S. or Canadian pharmacy license the opportunity to earn a Pharm.D. degree without returning full time to a college campus. During the 1999-2000 fiscal year, the program was coordinated by Drs. Vaughn Culbertson and Catherine Heyneman.

ADMISSION PROCEDURE

Candidates for the Non-T Pharm.D. program must complete an admissions procedure that includes submitting documented evidence of a strong academic record, clinical experience, and past achievements as a pharmacy practitioner. Priority is given to residents of Idaho; however, pharmacists are encouraged to apply regardless of their state of residence. Prior to admission to the program, candidates must travel to Pocatello to complete an assessment process, which includes interviews and baseline evaluation of clinical skills.

THE PROGRAM

The Non-T curriculum includes 28 credits of didactic course work that are taught utilizing a combination of videotapes, interactive web-based case studies, detailed syllabi, and textbooks. Each course is completely self-paced, with an assigned instructor who is available to students via telephone or e-mail for questions or assistance. It is recommended that the didactic course work be completed within a 3-year time frame. Upon completion of the didactic portion of the Non-T program, students must perform 28 weeks of clerkship training in various clinical pharmacy disciplines. These 28 weeks need not be completed consecutively. Over 300 clerkship sites have been established throughout the United States and Canada.

ENROLLMENT AND GRADUATES

As of May 2000 the Non-T program has graduated 153 students. Currently, there are over 170 active students enrolled throughout the U.S. and Canada. Our graduates continue to excel in the pharmacy arena; some publish in the pharmacy/medical literature and two recent graduates have accepted faculty appointments at other colleges of pharmacy.

PROGRAM CHANGES

The Non-T program has begun to attract a significant number of applicants from Canada. Only two Canadian colleges of pharmacy offer the Doctor of Pharmacy degree, making our program a desirable alternative for pharmacists in rural Canada. Clerkship sites are being developed in British Columbia, and discussion of a joint Non-T program has been initiated with the University of British Columbia.

Additionally, the Non-T program has entered into a collaborative clinical training agreement with the University of Utah College of Pharmacy. The intent of this agreement is to allow licensed pharmacists who are residents of and practicing in the state of Utah access to our Non-T program at a reduced tuition rate. Utah-based students will first complete the standard 28 semester credit hours of didactic course work through ISU. Once complete, the experiential portion of the program will be continued under the auspices of the University of Utah’s College of Pharmacy at their approved clinical training sites. Upon completion of the joint program, the Doctor of Pharmacy degree will be conferred by Idaho State University.

Everyone benefits from this agreement. ISU benefits by bringing more Utah pharmacists into our existing didactic curriculum. The University of Utah benefits by avoiding the high start-up and maintenance costs of repackaging their curriculum into a distance learning format. Most importantly, Utah pharmacists benefit by having access to ISU’s well-established, high quality Non-T program. We hope to pursue similar collaborative training agreements with other colleges of pharmacy in the near future.

Vaughn Culbertson, Pharm.D., Chair Department of Pharmacy Practice and Administrative Science & Director of the Nontraditional Pharm.D. Program
IDAHO DRUG UTILIZATION REVIEW PROGRAM

The Omnibus Budget Reconciliation Act of 1990 (OBRA 90) requires that each state establish a drug utilization review (DUR) program for Medicaid outpatients. As a result of this federal mandate, the Idaho Department of Health and Welfare created the Idaho DUR Program. This program is designed to help enhance the quality of care for outpatients receiving prescription medications by assuring appropriate drug therapy. Currently the College of Pharmacy is the department’s agent for implementation of the OBRA 90 requirements regarding retrospective DUR.

Retrospective DUR includes periodic examination of drug claims data and other records to identify prescribing and dispensing patterns. The screening includes comparing patient medication information against drug use criteria. Over the past seven years, the DUR staff has created explicit drug use criteria covering 20 drug classes and approximately 200 of the most commonly prescribed drug products. These criteria represent standards or guidelines for appropriate drug use, as well as identifiable circumstances in which specific drug therapy entails a high risk for adverse effects. Employing the expertise of individual faculty members within the college, criteria were formulated using standard drug compendia and an extensive review of the clinical literature. Approximately 100 drug-specific criteria have been designated as potentially high-cost or high-risk drug use situations in which communication with physicians and pharmacists is deemed necessary to alert them of potential problems.

The following problem types are screened: age-drug contraindication, required use of generic drugs, drug-disease contraindications, drug-drug interactions, incorrect drug dosage, incorrect duration of drug treatment, over- and under-utilization, as well as therapeutic duplication.

THE DUR BOARD

The Medicaid-appointed DUR Board is the decision-making body responsible for implementing and operating the DUR Program. Comprised of three practicing physicians, three practicing pharmacists, and one non-practicing physician the board is responsible for evaluating practitioner prescribing and dispensing behavior and determining appropriate educational or corrective interventions. Data are reviewed by the DUR staff and presented with recommended actions to the board for approval or modification. The DUR staff is responsible for implementation of all board actions.

ISU members of the 1999-00 DUR staff included: Vaughn Culbertson, Pharm.D., Project Director; Paul Cady, Ph.D., Data Management; Rex Force, Pharm.D., Research Director; Wendy Force, R.Ph., Clinical Specialist; Craig Kelley, B.S., Computing; and Julie Johnson, Pharm.D., Resident. Additionally, Dean Barbara G. Wells served at the board level as secretary.

The board’s primary emphasis is educational, providing information concerning drug therapy to practitioners via profile review, educational leaflets, and direct provider contact.

PROVIDER EDUCATION

The board, with recommendations from the DUR staff, approve all intervention strategies deemed necessary to improve the quality of care being delivered to Idaho Medicaid clients. Remedial strategies can include, but are not limited to:
• Written personal communications from the board to providers requesting information and documentation of specific drug use decisions
• Educational leaflets summarizing the mechanism, presentation, and possible solutions for a large number of common drug-related problems
• Cost graphics that summarize the relative cost implications and emphasize cost-effective alternatives
• Specifically designed and presented continuing education programs targeted for providers at professional meetings
• Direct, personal contact with individual providers deemed to be repeat or long-term irrational prescribers or dispensers. Contact may take place with members of the board, qualified staff approved by the board, or clinical consultants.

RETROSPECTIVE INTERVENTIONS
The DUR staff has been actively involved in developing and performing interventions that improve the prescribing and dispensing habits of Medicaid providers. In addition to improved patient care, many interventions result in cost savings to the Department of Health and Welfare for prescription medications. During FY1999-00, eleven interventions were performed that covered the therapeutic categories of drug/disease contraindication, drug/drug interaction, incorrect duration, over-utilization, therapeutic duplication, and under-utilization.

Additionally, the DUR database is frequently used to identify situations of medication overuse or abuse by recipients or high-risk drug therapy resulting from multiple providers. In the latter circumstance, the DUR program provides extremely valuable information to physicians and pharmacists who may be unaware of each other’s contribution to the recipient’s medical care.

EDUCATIONAL RESOURCE
The DUR program has proved to be an extremely valuable resource to students and faculty at ISU as well as to other state agencies. The Colleges of Pharmacy and Business have both used the DUR project as an educational and teaching resource.

Professional and graduate students in the college have actively participated in development of clinical criteria (practice standards) as well as data collection and analysis. This experience aids students in understanding the difficulties of working with complex databases, as well as the strengths and weaknesses of DUR. This experience is an important component of a well-rounded education and is possible only because the data are available on campus.

The College of Business also uses the DUR database to teach part of its medical-informatics program, providing students with a background in hospital, community, and other medical information systems. Through the DUR project, both undergraduate and graduate students have been provided the opportunity to address real life problems by designing computer software and applications for use by health care practitioners and the community.

PROFESSIONAL & SCIENTIFIC ACTIVITIES
During the 1999-00 reporting period, the DUR staff published eight abstracts. Additionally, one paper was submitted for publication.
GRADUATE PROGRAM

PHARMACY ADMINISTRATION

The pharmacy administration graduate program remained very active during the 1999-2000 academic year. A total of 11 students were enrolled in graduate courses, seven of which are seeking the Doctor of Philosophy (Ph.D.) degree. Students successfully completed several research projects, resulting in publications and presentations at national and international scientific meetings and special recognition for a M.S. graduate, Vijay Joish. Mr. Joish’s paper received an Outstanding Presentation Award at the International Society for Pharmacoeconomics and Outcomes Research meeting in Washington D.C. in May.

The mission of the graduate program is to advance research related to the enhancement of safe, effective, and efficient pharmaceutical health care. Students and faculty are actively involved in a broad range of research projects, including the study of depression in the elderly, quality of life resulting from therapeutic treatments, pharmacoeconomic analyses of drug therapies, methodologies to enhance professional education, and patient satisfaction with professional services.

Students enrolled in the pharmacy administration emphasis area of the graduate program are as follows:

**M.S. Students:** Raquel Jex, B.S., Rajesh R. Mehta, B.S., Hemant M. Phatak, B.S., and Kenna C. Wheeler, B.S.

With the addition of newly accepted applicants, the graduate program in Pharmacy Administration continues to grow in size and recognition.

PHARMACEUTICAL SCIENCES

The Department of Pharmaceutical Sciences is the state's program for postgraduate education in the pharmaceutical sciences (pharmaceutics, medicinal chemistry, cancer biology and immunology, regulation of cardiovascular and respiratory function, biochemical pharmacology and toxicology, neuropharmacology, signal transduction, new drug design and synthesis, and biopharmaceutical analysis). The mission of the department's graduate program is to train and motivate our students to succeed in their chosen career path through a broad based, multidisciplinary program. Drs. Eric Jarvi and Leslie Devaud coordinated the graduate program’s pharmaceutical sciences emphasis area for the 1999-2000 academic year. Candidates enrolling in the Master of Science and Doctorate programs must meet all requirements for admission to the ISU Graduate School and have an adequate background in the biological and physical sciences.

The Department of Pharmaceutical Sciences' 12 full-time faculty generate research support from diverse sources such as the University Research Committee, Faculty Research Committee, the State of Idaho, National Science Foundation, American Heart Foundation, National Institutes of Health, and private industry.

The department occupies research space in Leonard Hall and has access to modern research instrumentation including phosphorimaging, fluorescent and densitometric imaging, light and electron microscopy, differential scanning calorimetry, high pressure liquid chromatography, gas chromatography and fourier transform infrared spectrometry.

The department also has instrumentation for and expertise in nuclear magnetic resonance spectrometry, enzyme linked immunosorbant assays, electrophoresis, radiolmmunoassays, radioligand binding or uptake assays, cell culture systems, cell fractionation, development and characterization of submicron particulate systems,
metabolism, molecular biology and laboratory animal behavioral studies. The department continues to expand its research activities, including collaborations within and outside of our department and university.

We currently have 13 students enrolled in the pharmaceutical sciences emphasis areas of the college of Pharmacy graduate program: John Beck, Ritu Chadda, Shane Hanson, Carrie Mosher, and Swathi Pinnamaneni are in the Masters program. Luna Bennett, Cassandra Luce Hanson, Launa Lynch, Gaurangi Malthankar, and Alaba Ogunbadeniyi are in the Doctoral program. Tracy Becker, Joy Olbertz, and Brenda White are combined students, enrolled in both the professional Pharm.D. program as well as the graduate program. Luna Bennett, Cassandra Hanson and Alaba Ogunbadeniyi passed their comprehensive examinations and advanced to candidacy during the year.

The departmental faculty have continued to revise and expand graduate course offerings. We also are continuing to increase recruitment materials to include a web page. Efforts continue to obtain additional state-supported graduate student stipends.

---

**AGREEMENT SIGNED WITH THE UNIVERSITY OF UTAH**

The Idaho State University College of Pharmacy Nontraditional (NonT) Doctor of Pharmacy program has entered into a collaborative clinical training agreement with the University of Utah College of Pharmacy.

The intent of this agreement is to allow licensed pharmacists who are residents of and practicing in the state of Utah access to ISU’s NonT program using University of Utah College of Pharmacy clerkship sites.

Utah-based students will first complete the standard 28 semester credit hours of coursework through ISU at the non-resident tuition rate. The coursework is taught using a combination of videotapes, interactive Internet-based case studies, detailed outlines, and textbooks. Each course has an assigned instructor who is available to students via telephone for questions or assistance. The experiential portion of the program (28 credit hours of clinical clerkships) will be completed under the auspices of the U of U College of Pharmacy at their approved clinical training sites. ISU will confer the Doctor of Pharmacy degree to those students that successfully complete the program requirements.

ISU’s Nontraditional Doctor of Pharmacy program coordinated by Drs. Vaughn Culbertson and Catherine Heyneman is one of the largest and most respected external Pharm.D. programs in the country. Approximately 170 students currently enrolled in the NonT program are working pharmacists who recognize the value of enhancing their clinical skills and knowledge base.

Since its establishment in 1989, more than 150 students have graduated from ISU’s NonT Program, and two of its alumni are now assistant professors at other colleges of pharmacy.

Washoe Medical Center, Robert Fox, Pharm.D., Reno, NV

Western State Hospital, Mark Underwood, Pharm.D., Tacoma, WA
THE YEAR IN GIVING

The College of Pharmacy gratefully acknowledges the gifts of alumni and friends who support the education of future pharmacists. The gifts shown here are so vitally important to the continued success of the college. Without these gifts, the college would be thwarted in its pursuit of excellence and in its effort to support technological advances necessary for a cutting edge pharmacy education. All gifts are important to the college as we seek to compete for the best students from Idaho and beyond.

During 1999-2000 through the generosity of our alumni and friends, three new scholarship endowments were established. Frank L. Savage, Joseph W. Carlson, and Harold W. Driver each created new scholarships that will make a difference in the lives of pharmacy students. In addition, Ara Paul, Professor Emeritus Nevada Marie Higgins, Virginia Kanarr and Harold Driver each created planned gifts which will ultimately benefit pharmacy students. Significant additional gifts to existing endowments were received from Sidney L. Sly, Neal and Dorothy Broyles, June H. Peterson, Roy Y. and Linda Sumida, Dr. Barbara G. and Richard Wells, and Raymond J. and Joan Pullen.

Thanks also go to corporate donors who have supported us during the year. Our most notable corporate donors were Albertson’s Inc. and National Data Corporation Health Info Systems who donated and installed state-of-the-art prescription dispensing hardware and software in the Reed B. Peterson Pharmacy Practice Lab. Also, Shire Laboratories, Inc. generously donated HPLC equipment for the research program of Drs. Sudip and Nan Das. Matching gift companies bring extra power to individual gifts.

Special efforts to reach out to classmates by alumni Sidney Sly, Bill Eames, and Joseph Carlson exemplify the remarkable commitment ISU College of Pharmacy graduates have to their alma mater. The beginning of this commitment is clearly shown by students as they assisted with the Pharmacy Phonathon, this year receiving a record of over $49,000 in pledges from alumni and friends. Thanks to all of the generous donors to the College of Pharmacy.
PHARMACY ENDOWMENTS

(Market Balance as of June 2000)

John O. & Ester L. Wallace Endowment $5,025,667
Reed B. Peterson Faculty Development Endowment $109,693
Lane Alan Broyles Scholarship Endowment $97,726
Paul & Eleanor Loscalzo Scholarship Endowment $79,774
Sidney L. & Hetty H. Sly Scholarship Endowment $77,851
Dr. Claudia Senekowitsch Memorial Fellowship $66,656
Pharmacists’ Memorial Endowment $57,331
Pullen-Grey Pharmacy Scholarships $36,507
Judith Marie Bernat Memorial Scholarship Endowment $33,342
Roy Y. & Linda Sumida Scholarship Endowment $32,826
Dean Emeritus Frank P. Cosgrove Scholarship Endowment $29,346
Richard M. & Barbara G. Wells Scholarship Endowment $23,070
Frank L. Savage Scholarship Endowment $22,377
EIRMC Auxiliary Pharmacy Scholarship Endowment $21,184
Guy Curtis Waid, M.D. Memorial Scholarship Endowment $16,175
Lucille H. Kingsbury Memorial Scholarship Endowment $15,958
Gordon R. Klodt Memorial Scholarship Endowment $15,732
Robert L. & “Bill” Dixon Memorial Scholarship Endowment $15,128
Joseph W. Carlson Scholarship Endowment $12,821
Jeanette Low Pharmacy Scholarship Endowment $7,037
ISPA Past Presidents Scholarship Endowment $7,014
Harold W. & Lois A. Driver Pharmacy Fellowship $5,000

Total Pharmacy Endowments $5,808,215

Phonathon 2000
High Callers
THANK YOU!!!

The College of Pharmacy is truly fortunate to have the personal & financial assistance of so many alumni & friends. The financial contributions these generous individuals & organizations provide directly support student needs, scholarships, computer & laboratory equipment, the Greatest Need Fund, & many other programs. The college is pleased to formally acknowledge, with our greatest appreciation, the following gifts as received by the ISU Foundation (keeper of the official giving records) between July 1, 1999, & June 30, 2000*. Giving societies were based only on contributions to pharmacy during this period. Every effort is made to ensure accuracy, but errors or omissions may have occurred. Please bring any such errors to the attention of the college at 208-282-2175.

*Some June gifts were officially recorded in July. These gifts will be reported during the next fiscal year.

COLLEGE RECEIVES NEW FUNDING 1999-2000

The number of scholarship endowments for the college was boosted during the 1999-2000 fiscal year, as four alumni made generous contributions to establish four new scholarship funds.

THE PAST PRESIDENTS OF IDAHO STATE PHARMACY ASSOCIATION SCHOLARSHIP ENDOWMENT

After many years of annual scholarship support, the Idaho State Pharmacy Association (ISPA) Past Presidents established The Past Presidents of Idaho State Pharmacy Association Scholarship Endowment to support students in perpetuity. The scholarship is awarded to a pharmacy student who is a resident of Idaho. The endowment was created as a result of the on-going leadership and stewardship of alumna Marion Bowen, a 1952 graduate of the college. “Scholarships are really needed for ISU students of pharmacy. Many of the ISPA Past Presidents received scholarships from ISU and now they choose to give back to help current students,” stated Marion Bowen.

JOSEPH W. CARLSON SCHOLARSHIP ENDOWMENT

Alumnus Joseph W. Carlson established the Joseph W. Carlson Scholarship Endowment. Earnings from this endowment will provide assistance to married students in the third and fourth years of their professional pharmacy program. Specifically, the scholarship endowment targets pharmacy students that may not have the resources to complete their education without financial assistance.

HAROLD W. AND LOIS AUSTIN DRIVER PHARMACY FELLOWSHIP

Harold Driver established the Harold W. and Lois Austin Driver Pharmacy Fellowship to provide scholarship funds to a married P-4 student completing rotations outside the Pocatello area. This Fellowship honors Harold’s wife Lois, a 1943 University of Idaho – Southern Branch graduate in Music and Secondary Education, who passed away six years ago.

FRANK L. SAVAGE SCHOLARSHIP ENDOWMENT

Frank Savage, a 1951 graduate of the Idaho State University College of Education majoring in Physical Education has created a scholarship endowment in his name. For most of Frank’s life, he worked with the pharmaceutical industry and because he realizes the benefit and has seen the potential for pharmacists to help in their communities as well as the pharmaceutical industry, Frank decided to create a scholarship. The Frank L. Savage Scholarship Endowment has been created for promising pharmacy students.
2000 FACULTY AWARDS

Each class in the four-year doctor of pharmacy program selects a Teacher-of-the-Year. In addition to the four Teacher-of-the-Year awards, the graduating class selects a Preceptor-of-the-Year. The recipients are selected for their outstanding abilities to teach relevant and new material, motivate students to learn, maintain high levels of knowledge in their field and share their enthusiasm for the profession of pharmacy. The 1999-2000 recipients are:

Dr. Dana Diedrich - selected Teacher-of-the-Year by first year pharmacy students. Dr. Diedrich is a professor of Pharmaceutical Sciences and teaches Pharmacology I, Drugs in Society, Professional Student Seminar, and Case Studies.

Students nominating Dr. Diedrich wrote, “He has an engaging lecture style, which is both entertaining and informative, and he is very good at making his students feel like professionals. He is both organized and knowledgeable in the subject he teaches.

Dr. Anna Ratka - selected Teacher-of-the-Year by second year pharmacy students. Dr. Ratka is an associate professor of Pharmaceutical Sciences and teaches Pharmacetics I and II, and Neuropharmacology.

Students nominating Dr. Ratka wrote, “She is an excellent teacher. She is genuinely dedicated and concerned about her students. Her lectures are very well organized, and her tests are consistent and fair. She offers help outside of class and explains difficult principles in a clear way, using good examples.”

Dr. Catherine Heyneman - selected Teacher-of-the-Year by third and fourth year classes. Dr. Heyneman is an assistant professor of Pharmacy Practice and Administrative Sciences and teaches Pharmaceutical Care, Drug Information, and Case studies.

Students nominating Dr. Heyneman wrote, “The material she taught in Pharmaceutical Care II proved extremely valuable when it came to patient assessment. She has a wonderful ability to relay important information that is practical and worth retaining. She is always eager to share her knowledge that is useful in rotations and applies to the real world.”

Gary Wilburn, R.Ph., (no photo available) - selected as Preceptor-of-the-Year, provides a community pharmacy rotation for ISU fourth-year students at Lemp’s Apothecary in Boise, Idaho. This award is sponsored by Roche Laboratories and was given in recognition of Wilburn’s dedication to the practical training of pharmacy students.

A nominator stated, “I have had the wonderful opportunity to work with Mr. Wilburn and have gained many important skills while under his supervision. He has a vast knowledge not only on the art of pharmacy itself, but on the business and pharmaceutical care side as well. He takes a genuine interest in his customers by meeting any needs they may have.”

Congratulations to this year's faculty award recipients!
NEW FACULTY JOIN COLLEGE

Three new faculty members joined the ISU College of Pharmacy, filling positions vacated through retirements and attrition. Vinita Pai, Pharm.D., joined the department of Pharmacy Practice and Administrative Sciences, while Adeboye Adejare, Ph.D., and Nandita G. Das, Ph.D., joined the Department of Pharmaceutical Sciences. We couldn’t be more pleased to have the following highly accomplished faculty join our ranks:

**Dr. Adeboye Adejare** joined the college from the University of Missouri, Kansas City, Mo., where he was an Assistant Professor of pharmaceutical sciences and taught medicinal chemistry in the professional and graduate programs. Adejare completed his bachelor and masters degrees in chemistry at the University of Iowa, Iowa City, IA and received his Ph.D. in 1985 in medicinal chemistry from Ohio State University, Columbus, OH. He completed a three-year fellowship at the Laboratory of Chemistry, National Institutes of Health, in Bethesda, MD before accepting his first faculty position at the Newark campus of Ohio State University. He is one of five professors who developed the new College Level Examination Placement (CLEP) in Chemistry. Adejare brings to the college a research focus in design and syntheses of compounds that can be used as receptor and enzyme probes. His research is funded by several agencies including the National Institutes of Health (NIH), and he serves as a Science Advisor to the Food and Drug Administration (FDA). Adejare joins ISU as an Associate Professor of pharmaceutical sciences and will teach medicinal chemistry.

**Dr. Nandita G. Das** came to the college from Nova Southeastern University, College of Pharmacy, Ft. Lauderdale, FL. Das received her Bachelor and Master of Science in Pharmacy degrees from Banaras Hindu University, India, and in 1995 received her Ph.D. from the University of Pittsburgh. She was a postgraduate research scholar at SmithKline Beecham Pharmaceuticals while in Pennsylvania. After transferring to Florida, she practiced community pharmacy for Eckerd Drug Corporation for three years before joining the Nova Southeastern faculty. Das had been a visiting Assistant Professor of pharmacy at ISU since the fall of ’98. Her research interests focus on preformulation and formulation of drugs, proteins, and nucleic acids. She joins ISU as an Assistant Professor of pharmaceutical sciences and is teaching pharmaceutics, physical pharmacy, and the dispensing and compounding of drugs.

**Dr. Vinita Pai** joined the college from Ohio State University and Children’s Hospital in Columbus, Ohio. She completed a residency at Children’s Hospital and did a fellowship in pediatric pharmacotherapy. Pai received her Bachelors degree in pharmaceutical sciences from the University of Bombay, India in 1989. She is an alumnus of the University of Iowa, having received her Master of Science in Pharmacy in 1995 and her Doctor of Pharmacy degree in 1996. Pai’s research interests focus on pediatric hematology/oncology, pediatric infectious diseases, and neonatology. She joined the ISU Boise faculty as an Associate Professor and precepts students in the pediatric advanced practice experience at St. Luke’s Regional Medical Center in Boise.

"The College of Pharmacy
graduated 73 Doctor of
Pharmacy students in the
Class of 2000 and
honored 13 graduates
for excellence."
ACADEMY OF STUDENTS OF PHARMACY (ASP)
Duane Siercke - President
Mike McDevitt - President-elect
Heather Anderson - Secretary
Jennifer Garner - Treasurer
Eric J. Jarvi, Ph.D - Faculty Advisor

The Academy of Students of Pharmacy (ASP), a student branch of the American Pharmaceutical Association (APhA) is the largest pharmacy student organization in the nation. Idaho State University’s chapter of ASP hosts a sizeable membership and is very active within the region, building leadership qualities within its members while motivating and empowering them to become professionals within the field of pharmacy.

During the 1999-2000 academic year, ASP sponsored the following successful annual events:

- Pharmacy Fair, which offers personal interviews with employment recruiters from around the country for ISU students.
- A Dutch oven dinner in conjunction with the Pharmacy Fair which provides an opportunity for students, recruiters, faculty, and peers to socialize.
- A spaghetti dinner and auction raised travel funds for 17 chapter members to attend the national APhA-ASP meeting held in Washington, D.C. and aid for a fellow student who was battling leukemia.
- A patient counseling competition held in February which allowed students to sharpen their counseling skills and offered the opportunity to channel their knowledge into an informative scenario. This year’s winner, Jennifer Payton, was invited to compete at the National Patient Counseling Competition at the APhA-ASP National Meeting in Washington D.C.

In addition to the chapter’s annual events, members had the opportunity to travel. Several members attended the ASP Midyear Regional Meeting held in Missoula, MT, and 17 members attended the APhA-ASP National Meeting in Washington D.C. Each meeting provided students with an opportunity to network with other students and pharmacists in the region as well as the nation.

ASP joined forces with the Idaho State Pharmacy Association (ISPA) to co-sponsor a speaker who presented insight into opportunities in compounding pharmacy and hosted a continuing education program, which featured two guest speakers that delivered excellent seminars on breast cancer.

Due to chapter efforts, Operation Immunization was again a success and earned ISU its third regional award in a row. Operation Immunization is a program which increases the community’s awareness about immunizations and allows pharmacy students to deliver immunizations to the elderly, students, and the homeless.

ASSOCIATED GRADUATE STUDENTS OF PHARMACY
Launa Lynch - President
John Beck (fall semester) and Hemant Phatak (spring semester) - Vice President
Luna Bennett - Secretary
Kalind Pradhan - Treasurer
Eric Jarvi, Ph.D. - Faculty Advisor

AGSP, the Associated Graduate Students of Pharmacy, affectionately known as Animal Pharm, had an active and productive year.

Many graduate students received awards for research or travel funds for their graduate projects during the 1999-00 academic year. Kalind Pradhan, Launa Lynch, Gaurangi Mathankar, and Alaba Ogunbadeniyi received Animal Pharm presentation awards. The graduate students found time in their busy schedules to hold four fundraisers.

Animal Pharm challenged the faculty and staff to sporting event competitions throughout the academic year. The purpose was to increase the interaction between the graduate students, faculty, and staff. It was a great start on a new tradition that hopefully will be continued next year.

The membership is increasing as the graduate program in the College of Pharmacy grows.
AMERICAN SOCIETY OF HEALTH-SYSTEM PHARMACISTS (ASHP)
Joanne Kreuzer - President
Chris Owens - President-elect
Allison Clark - Vice President
Wendy Force, R.Ph. - Faculty Advisor

The 1999-2000 school year was a busy and productive one for ASHP. Membership is up with the addition of 11 new members, one of whom is a pre-pharmacy student. The year began with an ASHP membership presentation at the P-1 Seminar held in August. Information and applications were made available to all students.

The Clinical Skills Competition, held in September at Idaho State University was a great success. Our winners, Brian Christiansen and Jason Glick, went on to represent Idaho State University at the National Competition in Orlando, Florida.

ASHP/ISHP, Phi Lambda Sigma, and the Student Senate joined forces to sponsor a canned food drive for Thanksgiving in which over 200 food items were donated. In April ‘99, GlaxoWellcome and ASHP co-sponsored a lecture entitled Migraine Awareness and Treatment, presented by Dr. Erick W. Garland, a neurologist.

Finally, ASHP presented a Poison Prevention Program to over 500 school age children in Pocatello, including ISU’s Early Learning Center.

PHI DELTA CHI
Erin Keele - President
Shawn Williams - Vice President
Jennifer Butler - Secretary
Jennifer Garner - Correspondent
WanNell Lanier - Treasurer
Mike McDevitt - Morale Officer
Matt Parrott - Master-at-Arms
Charles Smeling - House Manager
Anna Ratka, Ph.D., Pharm.D. - Faculty Advisor

Phi Delta Chi, a co-ed pharmacy fraternity, was organized to promote professional and social activities in the spirit of brotherhood. Phi Delta Chi promotes unity within the college by collaborating with other pharmacy student organizations in events such as Walk Diabetes, the ISU Homecoming Parade, and Operation Immunization.

Phi Delta Chi serves the community by volunteering at the Pocatello Free Clinic and providing a student representative to the clinic’s Board of Directors. The chapter created a window display that was placed in area pharmacies, which provided jargon-free pamphlets about high blood pressure. Additionally, the chapter held several brotherhood activities such as a Thanksgiving potluck and regular Executive Committee breakfasts. Chapter members took advantage of leadership training and a bonding experience at the 2000 Western Regional Conference held in Laramie, WY. Erin Keele, was elected the Western Regional Correspondent for the 2000-01 year.

PHI LAMBDA SIGMA
Kimberly Wilcox - President
Joanne Kreuzer - Vice President
Sabrina Castillo - Secretary
Faculty Advisor - Dana Diedrich, Ph.D.

Phi Lambda Sigma, the pharmacy leadership society, recognizes students and faculty that have demonstrated leadership skills within the profession of pharmacy. This year the association conducted a canned food drive in conjunction with the Idaho Society of Health-System Pharmacists (ISHP) and the Student Senate, which produced over 200 food items that were donated to local families for Thanksgiving. Additionally, members helped sponsor families in need during the Christmas season. An induction ceremony was held in May at the Magnuson Alumni House. New officers were elected, and 15 new members were initiated.

"ASHP presented a Poison Prevention Program to over 500 school age children in Pocatello, including ISU's Early Learning Center."
RHOCHI
Aimee Wicker - President
Paul Cady, Ph.D. - Faculty Advisor

Rho Chi is the national pharmacy honor society which recognizes academic excellence. Rho Chi seeks to promote scholarly fellowship in pharmacy by bringing members together in fraternal and helpful association. Rho Chi, like its sister honor societies, seeks to increase awareness of the ethical and social responsibilities of the profession. Students must rank in the highest 20 percent of their class as determined by the college and have attained a minimum professional grade point average of 3.0 on a 4.0 scale.

In September of 1999, Rho Chi sponsored its Annual Back to School Picnic for College of Pharmacy students, graduate students, faculty, staff, family, and friends. The event was a big success, and the food prepared by the faculty was great.

During the fall semester, Rho Chi organized and ran a snack table in the student pharmacy lounge intended as a service for all pharmacy students, faculty, and staff.

Additionally members participated in the ISU Health Fair. Rho Chi members distributed samples of Advil®, Caltrate®, and Robitussin®. Students gave samples to individuals who came to the booth and answered questions regarding the samples as well as medications the participants were currently taking.

Rho Chi held an initiation ceremony in April at the Magnuson Alumni House. Eight new members were inducted into the society.

STUDENT SENATE
Aimee Wicker - President
Chris Owens - Vice President
Audrey Jeffers - Secretary/Treasurer
Tom Wadsworth - ASISU Senator
Paul Cady, Ph.D. - Faculty Advisor

Student Senate is the governing body for the college's student body. It includes the president and vice-president of each professional class, a representative of both graduate programs, the president of each student organization within the college, and the ASISU pharmacy senator. The Senate facilitates communication between the students, pharmacy organizations, faculty, and the dean.

This year the Senate helped to facilitate the development of a new pharmacy logo, which is available at SLT Graphics, Pocatello, for anyone who wishes to put the new logo on any item of clothing.

Discussion of a separate graduation ceremony for pharmacy students was initiated by the 1998-1999 Student Senate, and carried forward to the 1999-2000 Senate. Tom Wadsworth, 1999-2000 ASISU Pharmacy Senator, represented the college and was chair of a separate graduation committee established to research the issue. Wadsworth wrote a resolution establishing a separate graduation ceremony for the College of Pharmacy. The resolution was then presented to ASISU and passed unanimously in April 2000. The 2000-2001 Senate will continue discussion of this issue.

The Senate, along with the College of Pharmacy student body, provided Christmas presents to two local families in need of holiday assistance. The Senate established mailboxes in the office to help facilitate communication between the different classes. Additionally, many individual members of the Senate were involved in other projects such as Project Immunization, the ISU Health Fair, and various canned food drives. The senate also sponsored the end of the school year picnic at Ross Park.
GRADUATES RECOGNIZED
Thirteen receive achievement awards

The College of Pharmacy graduated 73 Doctor of Pharmacy students in the Class of 2000 and honored the following graduates for excellence.

Sabrina Allen was awarded the SmithKline Beecham Patient Care Award in recognition of superior professional achievement in clinical pharmacy practice and service, with regard to patient relations. Sabrina was also recognized with the American Society of Health-Systems Pharmacists (ASHP) Award in appreciation and recognition of meritorious service and leadership.

Deborah Burr received the Pfizer U.S. Pharmaceuticals Outstanding Leader Award, which is presented in recognition of leadership.

Lanning Baker and Anthony Dye received the Merck Award, which is presented in recognition of scholastic achievement and development in basic pharmaceutical sciences.

Vanessa Duncan Peck received the Mylan Pharmaceuticals Excellence in Pharmacy Award in recognition of high academic achievement and professional motivation.

Frank Egbert was awarded the Perrigo Award of Excellence in Nonprescription Medication Studies in recognition of excellence in professional services with regard to nonprescription medications.

Chris Johnson was recognized with the Facts and Comparison’s Award of Excellence in Clinical Communication in recognition of high academic achievement and outstanding clinical communication skills.

Jeff Johnson was recognized with the Lilly Award in recognition of academic achievement, leadership, and professional development.

Ben Nichols received the APhA-ASP Mortar and Pestle Professionalism Award, which is sponsored by McNeil Consumer Healthcare. This award recognizes exceptional professionalism and excellence in patient care in all aspects of a student’s academic pharmacy career. Nichols demonstrated commitment to the profession of pharmacy through involvement in professional organizations and other extracurricular learning opportunities.

Amy Scott received the Dean’s award in recognition of superior academic excellence. This award is given to the student with the highest grade point average in the college. Amy Scott was also recognized with the TEVA Pharmaceuticals Outstanding Student Award in recognition of excellence in the study of pharmacy.

Nate Smedley was presented the Roche Pharmacy Communications Award in recognition of effective pharmacist/patient communications.

Kemi Tunraribi was awarded the American Pharmaceutical Association (APhA) Academy of Students of Pharmacy (ASP) Senior Recognition Award. This award is presented in recognition of advancing the profession of pharmacy through outstanding service to the APhA-ASP Idaho State University chapter.

Paul Wofford received the Idaho State Pharmacy Association Award, which is given to an Idaho resident in recognition of superior scholastic achievement and professional development.
DEAN'S ADMINISTRATIVE COUNCIL
Barbara A. Adamcik, Ph.D., Chair, Faculty Affairs Committee
Paul S. Cady, Ph.D., Associate Dean
Vaughn L. Culbertson, Pharm.D., Chair, Department of Pharmacy Practice & Administrative Sciences
Christopher K. Daniels, Ph.D., Chair, Department of Pharmaceutical Sciences
Barbara G. Wells, Pharm.D., Dean

DEPARTMENT OF PHARMACEUTICAL SCIENCES

FACULTY
Adeboye Adejare, Ph.D., Associate Professor
Alok Bhushan, Ph.D., Assistant Professor
Nandita G. Das, Ph.D., Assistant Professor
Sudip Das, Ph.D., Associate Professor
Christopher K. Daniels, Ph.D., Associate Professor, Department Chair
Dana L. Diedrich, Ph.D., Professor
Leslie L. Devaud, Ph.D., Assistant Professor
Eric J. Jarvi, Ph.D., Associate Professor
Thomas R. LaHann, Ph.D., Associate Professor
James C. K. Lai, Ph.D., Professor
Anna Ratka, Pharm.D., Ph.D., Associate Professor
Cindy M. Wilson, Ph.D., Assistant Professor

AFFILIATE FACULTY
Barry Cusack, M.D., Boise VA Medical Center
Christopher Nielson, M.D., Boise VA Medical Center
Richard Olsen, Ph.D., Boise VA Medical Center
Dennis L. Stevens, M.D., Ph.D., Boise VA Medical Center
Denise Wingett, Ph.D., Boise VA Medical Center
