PREPARING LEADERS IN PHARMACY
THE COLLEGE OF PHARMACY, AN AGENT OF THE STATE OF IDAHO, IS A NATIONALLY-RECOGNIZED, STATEWIDE PROGRAM. THE MISSIONS OF THE COLLEGE ARE TO:

• Provide professional academic programs that prepare highly skilled, ethical, and compassionate Doctor of Pharmacy graduates who are agents of change and who deliver effective and efficient pharmaceutical care in urban and rural general practice settings;

• Provide graduate programs that enable qualified students to acquire more extensive knowledge in the pharmaceutical and social/administrative sciences and skills in research in order to function as educators and scientists in academic settings, government service, the pharmaceutical industry and the health care industry;

• Provide post-doctoral residencies and fellowships to prepare pharmacists for an advanced level of practice in generalist and specialized settings and for the conduct of clinical research;

• Develop and conduct specific research and service programs to discover and disseminate new knowledge and address the health care needs of society and the practice needs of pharmacists and other health professionals;

• Foster and advance innovation in the practice of pharmacy and optimization of safe and cost-effective drug therapy;

• Develop among graduates a sense of ethical responsibility, professionalism, and a commitment to life-long learning to support a practice of pharmacy with an evolving scope; and

• Meet the informational and educational needs of practicing pharmacists in the state. Education, research, and service programs are provided in an environment characterized by sensitivity to the importance of diversity and tailored to meet the needs of the citizens of Idaho and beyond.

“Our goal has always been providing an excellent education and the development of pharmacists...”
Dear Friends,

The ISU College of Pharmacy is continuing to move forward! This annual report will introduce an impressive collection of our accomplishments in 2002 directly related to the College’s mission.

Our goal has always been providing an excellent education and the development of pharmacists ready for the rigors of pharmacy practice today, and in the future. Over the years, this College has distinguished itself by being at the forefront of professional education.

We continue that tradition with a completely revised curriculum that began with this year’s entering class. The new curriculum better integrates the vast amount of knowledge necessary for today’s pharmacist, and beyond. It will better develop student’s critical thinking and problem solving skills, emphasize responsibility for learning and, subsequently, produce a life-long learner.

Early practice experiences will better integrate the developing knowledge with today’s practice environment and expose the student to potential career choices earlier.

To mark this occasion and to better signify the magnitude of entering this profession from the first day, the College conducted its first White Coat Ceremony with the entering class. This ceremony will be an annual event.

The College also continues to develop scholarships and research. In 2002, the College’s faculty members made 90 national presentations, produced 67 publications and were awarded $1,314,705 in research grants and contracts. In conjunction with Idaho State University’s research expansion, the Bioanalytical Research Facility was located in Leonard Hall under the direction of Dr. Adeboye Adejare. The College participated extensively in Idaho’s Biomedical Research Infrastructure Network grant aimed at developing the next generation of researchers.

As the cost of higher education increases and the responsibility for funding education is placed on the individual student, the need for student support becomes greater. We are indebted to the alumni and friends of the College of Pharmacy in providing funds for scholarships. There were four new endowments established this year that will provide scholarships indefinitely. These endowments are:

- Col. Garth H. Holmes Scholarship Endowment,
- Cathi Daily Ketterling Scholarship Endowment,
- Ralph E. & Betty L. Smith Scholarship Endowment,
- Nile Boyle & Julie Boyle Lindquist Endowment.

Scholarships make the student’s dream of becoming a pharmacist a reality. For many students, it is the only way they can enter this great profession and for that both they, and I, are enormously grateful.

Joe Steiner
The state-supported budget of the Idaho State University, College of Pharmacy was $3,484,564 in FY 2002. Subsequently, five percent was held back and a 10 percent reduction in state funding was mandated in the FY 2003, for a total loss of 18.5 percent in state funding to the University. The state supported budget includes monies for faculty and staff salaries, equipment, materials, supplies, travel and communication costs for the College of Pharmacy.

The College also received gifts in the amount of $256,180 which includes contributions through the annual phonathon fund drive. Grants and contracts received by College of Pharmacy faculty and graduate students in Fiscal Year 2002 totaled $1,082,258, and the indirect cost recovery from some of those grants was $49,324. Earnings from endowment funds netted the College $146,642. Student fees added $634,750 to the College’s budget, and sales and services brought in $165,051.

In order to fulfill the mission of the College of Pharmacy, state funds alone are not enough to meet the needs of the educational, research and service programs of the College. Additional funding is needed for equipment, supplies, special projects, research, student scholarships and fellowships, and special programs of the College. Annual giving and endowment income are vital components of the College’s budget.

Ruth Briscoe, B.B.A.
Business Manager

$1,314,705 TOTAL
The 2001-2002 academic year for the College of Pharmacy’s Student Affairs Office was rewarding and successful. The Class of 2002 included 59 Doctor of Pharmacy graduates. Of those earning a Pharm.D., 40 obtained their degree through the traditional pathway while 19 chose the nontraditional course. Competition among employers for graduates was intense. This year, every graduate seeking employment obtained a position.

The Pharmacy program attracts many qualified applicants. Admission to the program remains competitive. The College received 230 applications for admission for the fall semester of 2001. Of those applications, 111 were invited to interview and 54 were admitted to the program. Among the incoming class, Idaho residents represent 80 percent of the students.

With the generous assistance of alumni, industry and friends, the College was able to award $113,914 in scholarships during the 2001-2002 academic year. On behalf of the faculty and students, thank you to all who made it possible for deserving students to pursue the goal of pharmacy service.

Maintaining an adequate supply of practitioners necessitates that we work diligently in maintaining and recruiting pre-pharmacy students. Dr. Cynthia Foster continues to be an asset to our recruiting success. In addition, she serves as the advisor to pre-pharmacy students, advising and maintaining personal contact with pre-pharmacy students at Idaho State University and our affiliate institutions, assists students in their preparation for admission into the Doctor of Pharmacy program and the profession of pharmacy. Recruitment is crucial and rewarding. We help students explore career possibilities in pharmacy as we challenge them to prepare for our competitive admissions process.

Dr. Foster and I are actively involved in recruitment statewide, visiting pre-pharmacy students and advisors at all of Idaho’s universities, colleges and several high schools. While recruiting students throughout the state, I try to visit as many pharmacies as possible. It is indeed gratifying to see our past graduates as successful practitioners. It also is rewarding to hear of their accomplishments and see the difference they make for their patients, for the communities where they are employed and reside, and for our profession. It is an honor to have played a part in the education and training of these fine pharmacists. They are well prepared, capable of becoming leaders and agents of change in the profession.

Paul S. Cady

The Dean’s Advisory Council (DAC) serves as an advisory body to the dean of the College of Pharmacy. The DAC meets twice a year and provides counsel regarding the college’s curriculum, strategic planning, fundraising, program assessment, activities and functions, proposed legislation, and other areas as required. The membership of the DAC includes state and national pharmacy leaders, alumni, practicing pharmacists, pharmacy owners, and corporate and industrial leaders. Members of the DAC serve three-year terms that may be repeated at the discretion of the dean. The dean makes appointments to the council with recommendations from the DAC and college administration. The college sincerely appreciates another exemplary year of service from the following council members:

- James Alexander, Sav Mor Drug
- Gregory Betts, Cassia Regional Medical Center
- Marion Bowen, Retired/Idaho Board of Pharmacy
- Kurt Bullington, Idaho State University
- Eric Cannon, Intermountain Health Care
- Joseph Carlson, Retired/Merck & Co., Inc.
- Nicole Chopski, Northwest Pharmaceuticals, Inc., & Portneuf Regional Medical Center
- JoAn Condie, Idaho State Pharmacy Association
- Lisa Cowley, Prescription Center
- Charles Davis, ShopKo
- Paul Driver, St. Joseph Regional Medical Center
- Edith Dvorak, Walgreens
- William Eames, William M. Eames & Associates
- Tamara Eide, Idaho Department of Health and Welfare
- Ronald Endo, Portneuf Medical Center
- Robert Fischer, Ontario Clinic Pharmacy
- James Francis, St. Luke’s Regional Medical Center
- Allen Frisk, MedNow Pharmacy & Medical Supply
- Dorothy Galloway, Portneuf Regional Medical Center
- Lorri Gebo-Shaver, Super Save Drug
- Stanley Gibson, Fred Meyer Pharmacy
- Pamela Graham, Merck & Co., Inc.
- Neil Griggs, Teton Pharmacy & Home Health
- Steven Hadlock, The Medicine Shoppe
- Michael Hess, Northwest Pharmacy
- Kent Jensen, The Medicine Shoppe
- William Keller, Nature’s Sunshine Products, Inc.
- Cathi Ketterling, Sav Mor Drug
- Patricia Killingsworth, Idaho Society of Health-System Pharmacists
- Shawna Kitteridge, Idaho Department of Health and Welfare
- Dale Lavigne, Lavigne Drug Group
- Don Leonard, Chateau Drug
- Richard “Mick” Markuson, Idaho Board of Pharmacy
- Barbara Mason, Idaho State University
- Gary Meadows, Washington State University
- Larry Munkelt, St. Alphonsus Regional Medical Center
- Neil Reed, Eastern Idaho Regional Medical Center
- George Roe, Costco
- Frank Savage, Agouron Pharmaceuticals, Inc./Pfizer, Inc.
- Steve Shapiro, Albertson’s, Inc.
- Marilyn Silcock, Portneuf Medical Center and the Idaho Board of Pharmacy
- Sidney Sly, Retired/Intermountain Health Care
- Karen Smith, Merck & Company, Incorporated
- Edward Snell, Ed Snell’s Pharmacy Shop
- Dorsie Sullenger, Madison Memorial Hospital
- Frank Talboy, VA Medical Center
- John Tilley, Tilley’s Apothecaries, Inc.
- Rob Tyler, Tyler’s Gem Pharmacy
- Dwight Wallace, Wallace Drug
- Ralph “Moon” Wheeler, Former Idaho State Senator
- Jeanette Wiegang, Idaho State University
- Gary Wilburn, Lemp’s Apothecary
- Lynette Williams, Northwest Pharmaceuticals, Inc.
- Theodore Young, Procter & Gamble Pharmaceuticals

“The college sincerely appreciates another exemplary year of service...”
During academic year 2001-2002, department faculty have undertaken a variety of curricular, research and service activities to stay abreast of the challenges impacting pharmacy practice. Adding to these challenges are the many pharmaceutical and technological advancements that continually change the face of our dynamic health care system. The positive responses to these formidable tasks have been extremely gratifying, and I would like to briefly comment on some of the faculty’s activities and accomplishments during the year.

Faculty recruitment was an important activity during the year, and the department was successful in recruiting two outstanding new faculty. Dr. Glenda Carr will assume the ambulatory care teaching responsibilities at the Terry-Reilly Health Center in Nampa and Dr. Catherine Oliphant will develop adult medicine teaching responsibilities at St. Luke’s Regional Medical Center in Boise. Dr. Carr completed her residency and fellowship training at the University of Wisconsin. Dr. Oliphant comes to us from the University of Wyoming.

It is quickly evident that department faculty are extremely busy far beyond their customary teaching responsibilities. Departmental faculty members delivered more than 50 presentations to lay public groups, pharmacists, various health care practitioners and other researchers during the academic year. Furthermore, faculty members participate extensively in local, state and national pharmacy organizations. As always, this is in addition to their daily patient care responsibilities and collaboration with other health care practitioners and institutions in the community. Finally, the department continues its commitment to scholarship through important contributions to the pharmacy and medical literature over the past year. Each member of the department deserves recognition for their individual contributions. Their accomplishments are truly remarkable and certainly bring a strong sense of pride and recognition to the College and University as well.

I would like to take the opportunity to recognize the 239 affiliate faculty who contribute so importantly to our educational program. Although space does not permit individual identification, I would like to recognize a special group of practitioner/educators. These individuals include pharmacists at the University of Nevada Medical Center in Las Vegas, Reno VA Medical Center and Washoe Regional Medical Center in Reno. These individuals exemplify pharmacy education and practice on a daily basis. Moreover, they have contributed significantly and positively to the clinical clerkship program for many years. Finally, recognition is due to departmental secretaries, Ms. Sharlene Hetrick and Ms. Louanna Maheras. Their extraordinary skill and abilities in managing the myriad of details each day never ceases to amaze me. I thank all of you for your dedication and devotion to the College and our students. Your efforts are essential to our success.

I am extremely proud of the department’s record of accomplishments, and again honored to have served as its chair. Perhaps most importantly, however, I believe the future holds great promise and many opportunities. I look forward to reporting even greater accomplishments next year!

Vaughn Culbertson
Thank you for contributing to the education of future pharmacists.

- Matt Young, Pharm.D., Columbia Eastern Idaho Regional Medical Center, ID
The Department of Pharmaceutical Sciences is Idaho’s program for postgraduate education in the pharmaceutical sciences, which includes:

- pharmaceutics
- medicinal chemistry
- cancer biology & immunology
- signal transduction
- regulation of cardiovascular & respiratory function
- biochemical pharmacology and toxicology
- neuropharmacology of pain, substance abuse and behavioral neuroscience
- new drug design and synthesis
- biopharmaceutical analysis
- pharmacy administration

The objectives of the program is to encompass the broad training of pharmaceutical scientists, and include a strong component emphasizing critical thinking as well as oral and written communication skills.

The department strives to train and motivate students to succeed in their chosen career path through a broad-based, multidisciplinary program.

From fall 2001 through summer 2002, 20 students were enrolled in the pharmaceutical sciences emphasis areas of the College of Pharmacy graduate program coordinated by Dr. Leslie Devaud. Candidates enrolling in the Master of Science and Doctor of Philosophy programs must meet all requirements for admission to the ISU Graduate School and have an adequate background in the biological and physical sciences.

The Department of Pharmaceutical Sciences 11 full-time faculty generates research support from diverse sources such as the University Research Committee, Faculty Research Committee, the State of Idaho, National Science Foundation, American Heart Foundation, National Institutes of Health and private industry. Departmental faculty members continue to revise and expand graduate course offerings and expand recruitment materials, which include the Internet. Efforts continue to obtain additional state-supported graduate student stipends.

Tracy Becker, Joy Olbertz and Brenda White were in the combined program, enrolled in both the professional Pharm.D. program as well as the graduate program. All three graduated with their Pharm.D. and are now focusing on their research. Ryan Wells and Sherry Borchert joined the combined program and both are working towards a master’s degree in pharmaceutical sciences in addition to their Pharm.D. degree.

Launa Lynch and Gauri Malthankar passed their comprehensive examinations and advanced to candidacy during the year. Four students, Lanning Baker, Cassandra Hanson, Swathi Pinnamaneni and Carrie Mosher, completed their programs and received their graduate degrees.

**M.S. Students**
- Carrie Mosher
- Swathi Pinnamaneni
- Murali Kothuri
- Madhu Supraneni
- Madhuri Garimella

**Ph.D. Pharmaceutical Sciences Students**
- Lanning Baker
- Laura Lynch
- Shilpa Puli
- Nancy L. Renn
- Luna Bennett
- Ritu Chadda
- Shengguo Sun
- Kimberly Cleary
- Cassandra Hanson
- Haritha Mandula
- Jay Keller
- Gaurangi Malthankar
The 2001-2002 academic year was a time for unexpected changes for the Department of Pharmaceutical Sciences, the College of Pharmacy, and ISU. Dr. Eric Jarvi, with ISU since 1990, moved on to Ferris State University College of Pharmacy in Big Rapids, Michigan to take the position of assistant dean and chair of pharmaceutical sciences. Dr. Tom LaHann has begun a leave of absence to work for a bioterrorism think-tank in the Washington, D.C. area. Dr. Anna Ratka was on a sabbatical leave at the Huntsman Cancer Institute at the University of Utah, Pain Medicine and Palliative Care Department.

Consolidation of University resources due to state budgetary woes prompted planning for future cuts in faculty, including the College of Pharmacy, with the loss of one full-time position in the Department of Pharmaceutical Sciences. While these changes will continue to provide significant challenges to the department, we have continued to build upon our progress over the last few years.

Joining the department this next year as a new associate professor of pharmacology is Dr. Fred O. Risinger from Oregon Health and Science University. Dr. Risinger specializes in behavioral pharmacology and utilizes genetic approaches to understand how behavior and drug addiction intersect.

Additionally, as part of the Idaho Biomedical Research Infrastructure Network program, (BRIN), we were funded by the National Institutes of Health (NIH). This program will establish new bioinformatics and research infrastructure across the state with a collaborative effort between Idaho State University, Boise State University and the University of Idaho. This program also will significantly enhance the research capabilities at ISU through new faculty positions, faculty research support and new, state-of-the-art research equipment and support for graduate programs.

Overall, the department submitted over $5.4 million in research grant proposals. Our annual research funding was over $800,000 for the year, including six programs funded through the NIH, either directly or via subcontract collaborations.

The entire department has continued to be engaged in the process of curricular revision for the professional program. In concert with teaching objectives of the department, the new curriculum will reintroduce basic science faculty into the third year of the professional curriculum. We have been working, including a department retreat, to develop new approaches to help students integrate critical thinking and problem solving skills with basic science concepts that underlie drug therapy.

Faculty continued to teach many credit hours among sections of service courses to other healthcare professions including nursing, dental hygiene, physical/occupational therapy, physician assistant and nurse practitioner programs. These courses are taught in locations including Pocatello, Lewiston, Twin Falls, Boise and Idaho Falls.

This next year will continue to be both challenging and exciting. Our enthusiasm for research and teaching will continue to enhance the visibility and prestige of the department, the college and the university.

Christopher Daniels
Often, Idaho State University College of Pharmacy successes begin with a financial donor. During fiscal year 2002, the support of alumni and friends helped Idaho State University educate remarkable students, support brilliant faculty, fund innovative research and strengthen a nationally-ranked pharmacy program.

During this fiscal year, ISU College of Pharmacy benefactors contributed a total of $256,079 in cash, stock and other gifts. Of this total, $134,044 was contributed to strengthen existing scholarship endowments, fellowships and internships while $59,191 created new scholarship endowments. Donors of these newly established scholarship endowment funds are highlighted in this year’s annual report. Such gifts will have a long-standing impact. An endowment lasts forever.

Scholarships awarded during the fiscal year totaled $113,914 in tuition and housing aid. Endowment funds and annual gifts from friends, foundations and drug companies assisted in providing about 65 scholarships.

Among the College’s many supporters this year were long-time benefactors Dorothy Broyles and her husband, the late Neal Broyles who passed away in September, 2002. Their enduring support of the College through further funding of two endowments established in memory of each of their sons, Lane Allan Broyles and Neal Atlee Broyles, has been remarkable.

We are obliged to Mr. Frank Savage, the College’s 2002 Distinguished Service Award recipient, whose continuing generosity, also has spawned matching gifts by The Pfizer Foundation, providing generous scholarships to deserving students from the Frank L. Savage Scholarship Endowment.

Also noteworthy among the broad range of donors who contributed to the growth and excellence of the College is Mr. William M. Eames. Mr. Eames, a 1957 College of Pharmacy alumnus and former owner of California-based Bill’s Drug Stores, provides generous gifts of time and financial support. His support benefits students pursuing a joint program of Pharm.D. and Master’s of Business Administration. In the interest of philanthropy to the College, Mr. Eames has generously sponsored alumni events in California.

Wherever the focus, whatever the amount, all gifts to support the College are important and valued.

The College of Pharmacy annual Phonathon in conjunction with Connection ISU had its most successful year ever bringing in $55,533 by the end of the fiscal year. The Phonathon is a student fundraising effort, achieved through at least five evenings of telephone calls by pharmacy students to friends and alumni of the College. This annual event is vital in raising funds for academic scholarships and direct project support for the College. We are grateful to those who support the annual student Phonathon.

Gifts of $1000 or more were received from the Stanley M. Reinhaus Family Foundation, IBM Matching Grants Program, J. M. Long Foundation, Bi-Mart Corporation, Wyeth, EIRMC Auxiliary, Inc., Albertson’s Incorporated, Village Pharmacy, Mr. and Mrs. Wang Kan (’75), Mr. Donald J. Leonard (’74), Ms. Merilyn Dunn Ross (’81), Dr. and Mrs. Charles Berry (’54), Mr. and Mrs. Donald Darrow (’57), Dr. and Mrs. Joseph Steiner, Sam Viersen Family Foundation, Inc., Mr. and Mrs. John Orr, Dr. and Mrs. Ara Paul (’50), Bartell Drugs and the Idaho Society of Health System Pharmacists.

Tressa Rockwood

Tressa Rockwood
Director of Development
SUPPORTING THE COLLEGE

AWARD RECIPIENTS OF 2002

Dean Joseph Steiner presented Mr. Frank Savage, left, with the 2002 Distinguished Service Award. College of Pharmacy 1961 graduate Joe Carlson, above, was chosen to receive the 2002 Professional Achievement Award. Both spoke at the College’s graduation banquet. Carlson led the graduation processional of the College on May 18, 2002 at the ISU Commencement ceremonies. Both are long-time supporters of the College of Pharmacy and ISU.

FISCAL YEAR 2001-2002 CONTRIBUTIONS - $256,079

Newly Created Scholarship Endowments $59,191 - 23%
CE & Research $600 - .25%
Pharmacy Endowment Gifts $31,238 - 12.25%
Gifts to existing Scholarship Endowments & Fellowships $102,804 - 40%
Greatest Need Gifts $61,089 - 24%
Gifts in Kind $1,156 - .5%
Mr. Nile Boyle, ’56 College of Pharmacy graduate, and daughter, Julie Boyle Lindquist, College of Business ’84, established the Nile Boyle and Julie Boyle Lindquist Scholarship Endowment.

Their endowment is designed to provide scholarships for underprivileged or minority undergraduate students in the College of Business or the College of Pharmacy who are not eligible for academic scholarships.

After graduating, Nile served in the military for three years before joining Reed Drug in Rigby, Idaho.

In 1965, he opened his own drugstore in Rexburg, Idaho. During Nile’s pharmacy career, he also spent nine years serving on the Board of Pharmacy, 16 years on the Rexburg City Council and nine years as Mayor of Rexburg. He is now retired.

Nile’s daughter, Julie Boyle Lindquist, currently resides in Salt Lake City, Utah where she is a vice president of American Express.

In February 2002, Col. Garth H. Holmes established an endowment for the benefit of students attending the College of Pharmacy.

The Garth H. Holmes Scholarship Endowment awards one scholarship each year to an Idaho resident who is a first-year Pharmacy student. Financial need also is considered.

Col. Holmes received his B.S. degree in pharmacy from ISU in 1960. While attending the College of Pharmacy, he also served as president of the Phi Sigma Kappa fraternity.

Col. Holmes also attended Boston University where he earned his master’s in education degree in 1974.

A colonel in the U.S. Army from 1960 to 1994, Holmes has served as a community pharmacist, a pharmacy consultant for the State of Washington and as an affiliate instructor for the University of Washington School of Pharmacy.
Betty Smith created the Ralph E. and Betty L. Smith Scholarship Endowment in April, 2002, as a living memory of her late husband, Ralph E. Smith of Buhl, Idaho. This endowment will provide one or more full fee scholarships each year to assist third and/or fourth year students enrolled in the College of Pharmacy.

Ralph E. Smith was a 1950 graduate of the College of Pharmacy and a very active part of the professional and civic community during the 37 years as a pharmacist in Buhl.

He served as President for the Buhl Economic Council and the Buhl Chamber of Commerce. Ralph received the Community Service Award from the U.S. Jaycees in 1979 and in 1993, he was awarded the prestigious Bowl of Hygeia, one of the highest awards given in the pharmacy profession.

Betty Smith has been a teacher much of her life, most recently with the College of Southern Idaho.

The Cathi Baily Ketterling Scholarship Endowment to the College of Pharmacy was created in March, 2002. Ketterling, a 1995 graduate of the College of Pharmacy, created the endowment to benefit students enrolled in the College of Pharmacy professional degree programs. The scholarship is intended to stay with the same student for all four professional years of the program, provided they maintain a minimum 2.75 GPA for Pharmacy coursework.

Ketterling also serves as a member of the College’s Dean’s Advisory Council. The Council meets twice a year and provides counsel regarding the college’s curriculum, strategic planning, fundraising, program assessment, activities and functions, proposed legislation and other areas.

Ketterling resides in Twin Falls where she is employed with Sav Mor Drug.
