Goals and Objectives for Drug Information Clerkship

OBJECTIVES:

To allow the student to gain experience in:

1. Selecting relevant primary, secondary, and tertiary sources to answer a question.

2. Communication skills by receiving drug information questions and obtaining proper background information.

3. Designing search strategies, conducting literature searches, and evaluating literature for reliability and applicability.

4. Formulating and communicating written and oral responses to drug information inquiries after clearing with the preceptor.

5. Developing monographs evaluating new drugs or comparing drug therapies.

6. Preparing articles for journal or newsletter publication.

7. Developing criteria for drug utilization services.

8. Critiquing journal references and presenting criticisms.

10. Other experiences as they become available (P&T, DUR, etc.).
